SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SUPPLEMENTARY INFORMATION:

I. Background

Pursuant to 35 U.S.C. 31 and 32, and 37 CFR Part 10, the PTO's Office of Enrollment and Discipline (OED) receives and acts upon applications for registration to practice before the PTO in patent cases, prepares and grades the Registration Examination for Patent Practitioners (Registration Examination), maintains a register of all individuals entitled to practice before the PTO in patent cases, conducts investigations into possible violations of the PTO's Disciplinary Rules by practitioners practicing before the PTO in all matters.

In recent years, the preparation and administration of the Registration Examination has taxed OED's resources. The PTO is seeking to restructure the administration and format of the Registration Examination in order to free resources needed to investigate and take appropriate action against individuals who no longer meet the qualifications necessary to represent others before the PTO. The Registration Examination restructuring should provide greater assurance to our patent applicants that registered practitioners possess the essential skills necessary to practice before the PTO in patent cases. Moreover, in furtherance of these goals, the PTO is seeking to establish continuing education requirements for registered patent practitioners and an annual registration fee. The annual fee would be used to support the costs associated with the continuing education program and with fulfilling OED's ongoing disciplinary responsibilities.

II. Issues for Public Comment

Interested members of the public are invited to testify and to present written comments on issues related to the discussion topics outlined below, including the specific issues identified in the questions following each topic.

A. Administration and Format of the Registration Examination for Patent Practitioners

The purpose of the Registration Examination is to determine whether individuals who seek to practice before the PTO in patent cases possess the necessary qualifications. At present, the Registration Examination consists of two parts: (1) a multiple-choice portion that tests knowledge of PTO practice and procedure, and (2) a portion that primarily tests claim drafting ability. OED prepares and grades the Registration Examination, regrades the Registration Examination when requested, and drafts reconsideration decisions of the regrades when requested.

The PTO is considering restructuring the PTO practice and procedure portion of the Registration Examination such that it is a computer-administered examination. At the completion of the computer-administered examination, an applicant would be immediately provided with a computer-graded score. The computer-administered examination would be offered numerous times throughout the year at various locations around the United States. Only applicants who have passed the computer-administered examination would be eligible to complete further requirements for registration.

As a further requirement for registration, the PTO is considering substituting the claim drafting portion of the Registration Examination with a comprehensive course on preparation and prosecution of patent applications, including drafting of specifications, claims, and responses to office actions. The PTO is also considering apprenticeships as alternatives to the comprehensive course. The PTO seeks public input on these considerations and other general matters relevant to restructuring the administration and format of the Registration Examination. In addition, the PTO seeks public input on the following particular questions:

VOL
1191
ISS
3
OC
15
1996
UMI

1. Should the PTO give a computer-administered examination consisting of a bank of reusable questions?

2. Should the PTO develop the comprehensive course on preparation and prosecution of patent applications or, in the alternative, should the PTO just develop criteria for the course?

3. Should the PTO teach the course or, in the alternative, should the course be taught by non-PTO entities or individuals, such as universities and professional associations?

4. What qualifications should the course instructors have?

5. If the PTO does not teach the course, should the PTO certify the available courses?

6. Should former PTO examiners be required to pass the computer-administered examination if they wish to practice before the PTO in patent cases?

7. Should former PTO examiners be required to take the course or participate in an apprenticeship if they wish to practice before the PTO in patent cases?

B. Establishment of Continuing Education Requirement for Registered Patent Practitioners

The purpose of the continuing education requirement is to provide greater assurance to the PTO's patent applicants that individuals who practice before the PTO in patent cases possess the necessary qualifications. At present, the PTO does not require registered patent practitioners to continue their legal or technical education. The PTO seeks public input on the establishment of a continuing education requirement for registered patent practitioners and other general matters relevant to the requirement. In addition, the PTO seeks public input on the following particular questions

1. Should the continuing education requirement mandate minimum requirements for legal, technical, and legal ethics education? Or, in the alternative, should the continuing education requirement mandate minimum requirements for continuing education that can be met with either legal, technical, or legal ethics education?

2. Should the PTO give credit to patent practitioners for relevant legal and ethics courses taken to meet a state bar's continuing education requirement?

3. What penalty should be imposed for failure to meet the continuing education requirement?

4. What is a reasonable number of required continuing education credits?

5. Should the qualifying legal education be limited to patent law?

C. Establishment of an Annual Fee To Maintain Registration

An annual fee would be used to support the costs associated with the continuing education requirement and to provide resources to OED to fulfill its ongoing disciplinary responsibilities. At present, the PTO does not require an annual registration fee for registered patent practitioners. The PTO seeks public input on the establishment of an annual fee for registered patent practitioners and other general matters relevant to an annual registration fee.

III. Guidelines for Oral Testimony

Individuals wishing to testify at the hearings must adhere to the following guidelines:

1. Requests to testify must include the speaker's name, affiliation, title, telephone number, facsimile number, mailing address, and Internet mail address (if available).

2. Speakers will be provided between five and fifteen minutes to present their remarks. The exact amount of time allocated per speaker will be determined after the final number of parties testifying has been determined. Efforts will be made to accommodate requests made before the day of the hearing for additional time for testimony.

3. Requests to testify may be accepted on the day of the hearing if sufficient time is available on the schedule. No one will be permitted to testify without prior approval.

4. A schedule including approximate times for testimony will be provided to all speakers on the morning of the day of the hearing. Speakers are advised that the schedule for testimony may change during the course of the hearings.

IV. Guidelines for Written Comments

Written comments should include the following information:

1. Name and affiliation of individual responding.

2. If applicable, an indication of whether comments offered represent the views of the respondent's organization or are the respondent's personal views.

3. If applicable, information on the respondent's organization, including the type of organization (business, trade group, university, non-profit organization, etc.), and the general areas of interest to the organization.

If possible, respondents should include a machine-readable submission of their written comments. Machine-readable submissions can be provided via Internet electronic mail or on 3.5" floppy disk formatted for use in either a Macintosh computer or MS-DOS based computer. The document should be formatted as either plain text, ACSII text, Microsoft Word (Macintosh, MS-DOS, or MS-Windows), or WordPerfect (Macintosh, MS-DOS, or MS-Windows).

Information that is provided pursuant to this notice will be made part of a public record and will be available via the Internet. In view of this, parties should not provide information that they do not wish to be publicly disclosed or electronically accessible. Parties who would like to rely on confidential information to illustrate a point being made are requested to summarize or otherwise provide the information in a way that will permit its public disclosure.

Dated: September 20, 1996.

Bruce A. Lehman,
Assistant Secretary of Commerce and
Commissioner of Patents and Trademarks.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

*A communication from the examiner should have been received in most applications filed prior to this date.

Patents will Expire as Follows:
(1) The term of any utility or plant patent that is in force on or results from an application filed before June 8, 1995 is the greater of the 20 year term provided in 35 U.S.C. 154(a)(2) or 17 years from grant subject to any terminal disclaimers. 35 U.S.C. 154(c)(1).
(2) All utility and plant patents granted on applications having an actual United States filing date on or after June 8, 1995 are granted for a term which begins on the date on which the patent is granted and ends 20 years from the date on which the application was filed in the United States. If the application contains a specific reference to an earlier application under 35 U.S.C. 120, 121 or 365(c), the patent term ends twenty years from that date on which the earliest application was filed. 35 U.S.C. 154(a)(2).
(3) All design patents are granted for a term of 14 years from the date of the grant.
However, the term of any patent may have been curtailed by disclaimer under the provisions of 35 U.S.C. 153, have lapsed due to failure to pay maintenance fees, or have been extended under the provisions of 35 U.S.C. 154, 155, or 156. Thus, if more reliable information is needed with respect to a particular patent, then the specific patent file should be reviewed to determine the actual date of patent expiration.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
